Whom Do You Want Doing Your IT?

I was recently contacted by a national vendor that is now selling Microsoft 365 in a push to sell their Managed Services. It was interesting as they are trying to sell Microsoft and Managed Services to a Managed Services provider! It struck me, if they do not even know to whom they are selling their services, how do you think they would actually do with managing your network?

Sure, you can say, "Well, that is just the sales guy. The IT guys can do everything remotely these days."

It's true, a lot of people, business owners included, tend to think what we, as your Managed Services Provider, do is easy. So why not go with a national company and combine your billing?
